

business software for large & wide format

Are you looking for a simple and effective way to simplify your administration?

## These large format companies already count on MultiPress, how about you?

MultiPress Business Software applies to every administrative aspect of your business. Quotations and (post-) calculation, invoicing, order management, time registration, purchasing, planning, JDF/JMF, e-business and many other business processes are just a few clicks away. You supply the creativity and we'll do the rest!

### DIOSSE PRINTING SOLUTIONS

Dioss is a merger between New Jev Screen (screen printing), Daelprinting (large format printing) and Ceuppens Printing (offset printing). As a result, Dioss has no limitations when it comes to size and is therefore the market leader in terms of large format, digital and screen printing. Since 2000, they have been working with MultiPress from Dataline Solutions, not surprisingly the market leader in terms of business software for the graphic industry. They have a specific module with administration and reporting possibilities for each business sector.

### ARTI MARTINIQUE

Market leaders in a certain segment always find each other. They have a common vision and the big picture is absolutely clear to them: no waste of time and the business processes need to run flawless. This makes proper sense to a company that offers offset, screen printing, large format and digital print, along with design services and more ... When Arti, the largest printing company of Martinique, was looking for a solution in administrative automation: CRM, time gain, tight structure, transparent planning, comprehensible stock management, calculation, thorough reporting - they quickly found their equivalent in MultiPress.

### PPP NETHERLANDS

Digital poster prints, screen prints and banners for the decoration of shop windows, buses and trams, cars and buildings, nothing is too much for PPP Nederland. All the advertising on public transport within the Netherlands originates from their machines. Only the best is good enough for such a large company. MultiPress brings home the bacon!

# Large Format Calculation

## 93%

of all orders are preceded by a quotation

The statistics are clear. For 93% of all orders, a quotation is calculated beforehand. It goes without saying that the calculation of a quotation needs to be accurate, simple and fast. And faster than MultiPress is not possible. The catalogues of the media suppliers are directly consulted upon calculation. Customer-specific prices are taken into account and any allowed variation (+ or -) from the base rates can be determined per customer. This way, all price agreements are automatically processed in your calculations and orders. The Large & Wide Format Calculation engine allows MultiPress to divide the specific m<sup>2</sup> prices according to print-related parameters (set-up time, printing time, ink and media). Depending on the print quality, media & machines, MultiPress calculates exactly how much time is needed to produce the jobs.. This is the only way in which planning, registration and post-calculation can be done automatically. When a PDF file is received, MultiPress is able to perform the calculation fully automatically. In case of modifications in print runs, versions, extras, speeds, margins, etc., one push on the button is enough to calculate the print jobs and to prepare the quotation letter for printing, mailing or forwarding. The imposition/layout is also represented graphically in a neatly arranged way, a must for a clear work file.

Read more on [MultiPress.biz/mr1ais](https://MultiPress.biz/mr1ais)

## ADVANTAGES

- Working with standard calculations
- Automatic calculation based on a PDF file
- Separation of m<sup>2</sup> prices according to print-related parameters (set-up time, printing time, ink and media)
- Exact calculation of production time
- Calculation of variations (print run, media, finishing ...)
- Printing and/or e-mailing the quotation with one click
- Fully automatic calculation based on surface and surrounding using the large format finishing module

**“MultiPress was exactly the software for large format and digital printing businesses we were looking for.”**

**José Luis Marín** - General director

Spain is commonly known as one of the best holiday destinations. However, did you know excellent graphic work is delivered there as well? A great number of large companies regularly make use of the services offered by Prodigitalk in the field of transactional printing, direct marketing and manuals. These customers include the City of Barcelona, Aegon, Redix Gas, Gas Natural Fenosa and Seat. Despite the efforts made by the Spanish company on behalf of its customers, the back office suffered from a lack of efficient tools for comprehensive calculation, planning and follow-up. Easy calculations were made via an online tool while more complex calculations were done in Excel. Orders & time schedules were drawn up by hand. MS Navision Dynamics was used for the eventual invoicing process. This caused administrative chaos. The back office staff were regularly sweating, and not only because of the high temperatures. So MultiPress took the plane to Spain, where we were never active before. So the first and most important task was to translate everything. The entire front end had to be available in Spanish. Prodigitalk now boasts a brand-new CRM, comprehensive calculations, a clear planning and production overview and time registration. They are once again ready for the upcoming years of growth and prospecting. ‘En español ...’

More information about the 11 pre-calculation possibilities? Go to [MultiPress.biz/7eowfd](https://MultiPress.biz/7eowfd)

# Customer and supplier management

In the MultiPress Relationship module, all contact information is managed centrally. No more wasting time searching spreadsheets, emails and databases! Letters, faxes, emails and telephone calls are stored centrally and are accessible to everyone. Of course, MultiPress also includes sector-specific data such as: who placed the order? What is the customers ordering behaviour? Consider the relationship between quotation requests and orders or the number of failed orders and the costs involved... Suppliers have specific labels so that quotation requests are more precise. The interaction history can be checked in an activity log, which ensures a more efficient commercial follow-up. You no longer need post-its, because MultiPress spontaneously shows a digital post-it wherever and whenever you really need it. This centralised approach ensures more satisfied customers, higher efficiency and better results.

## 85%

85% of all CEOs want a centralised CRM system

## ADVANTAGES

- User-friendly and consistent tab structure guarantees a clear overview
- Central customer data management for all internal and external staff
- Synchronisation with any smartphone and tablet
- Managing supplier agreements and customer specific rates
- Easy import of new data
- Smart export in line with (e)mail campaigns
- 75% time gain when using customer specific rates

## YE PRINT

**“Personal customer assistance through the built-in CRM module of MultiPress is a huge asset.”**

**Thomas Dhondt** - Manager

Ye Print in Waregem (Flanders) not only has a large format division (up to size 170x340 cm), but also specialises in high-quality digital and offset printing, especially for B2B customers such as Ikea, Lidl and Thomas Cook. In 2013, we realised how much time we lost by using software such as Excel and Outlook for calculations and quotations. In MultiPress, we use the CRM module very frequently. The embedded CRM system makes it very easy to manage our customers, prospects, suppliers, ... and to send a mailing to all our customers on a regular basis. We use this function to announce our annual leave, the start of a new campaign or the production of new products. An important advantage is that each mailing is personal as it is linked to the CRM system. This way, each customer feels personally addressed. This personal approach enables us to generate more leads and more work...

# Warehouse and Stock management

Many companies still manage their stock manually in MS Excel spreadsheets. Each pallet is entered manually and each mutation implies an extra action in Excel. You easily have many hundreds of pallets, in which case the MultiPress warehouse and stock management module is indispensable. With this module, all pallets receive a unique location with production time, operators, barcodes, etc. Each shelf in the warehouse is visualised in 3D and you immediately have an overview of the location of different pallets of the same type. Thanks to MultiPress, everything runs more smoothly and you have automatic traceability as required by many official instances. The employees have an overview of the available raw materials 24/7 and can generate a 100% accurate picking list with just one push of the button. An extra advantage is that raw materials can immediately be reserved when an order is placed, so stock shortages are a thing of the past. In short, nothing but advantages, with minimum effort.

Your warehouse in **3D**  
the right information 24/7

## ADVANTAGES

- Reserve raw materials when an order is placed
- Prepare reservation charts automatically
- Deduct quantities automatically
- Move pallets very easily
- Keep a clear overview of stock location
- Organise locations by means of a barcode system
- Allow customers to place advance orders
- Enable automatic conversion in picking lists

More information on [MultiPress.biz/bw6owx](https://MultiPress.biz/bw6owx)

## PEETERS - ORIËNTALISTE

**“Look for the best balance between printing and storage costs”**

**Luc Peeters**, Managing Director

Founded in 1857, printing business Peeters-Oriëntaliste is a sister company of scientific publisher Drukkerij Peeters from Leuven. The company produces a large number of high-quality scientific works every year, particularly in social sciences (theology, philosophy, philology, medicine and related fields). This is a niche market with high production demands. To rationalise production, they opted for MultiPress. The numbers of copies are decreasing because publishers or customers do not want to take risks. That is why stock levels have to be kept as low as possible. Together with the customer, Peeters-Oriëntaliste looks for the best balance between printing and storage costs. Depending on the agreement, assignments are printed, stored, and delivered according to demand. “You can consider this an additional service of the printing business.”

More on order management? Go to [MultiPress.biz/vzqdp](https://MultiPress.biz/vzqdp)

# Dispatch planning

## 75%

fewer transport costs thanks to transparent planning

"A delivery in London? But we have just returned from London!" For many companies the daily deliveries and pickups of goods constitute a big challenge. Not to mention the orders that have to be delivered at several addresses.

This quickly evolving MultiPress module provides a clear overview of all dispatch lines. Not just drop shipments to clients, but deliveries to suppliers and the connected pickups as well. As the shipping date sometimes differs from the delivery date, MultiPress can link this to the delivery address. The dispatcher can subsequently enter the delivery lines in a list, arrange them per shipping method and export them so that the courier software can use them for further dispatch. When the delivery has been received, the delivery line disappears from the dispatch planning so that you can turn over a new leaf at the end of the day. Indispensable, easy, cost-cutting, efficient... tick where appropriate.

Read more on [MultiPress.biz/m0b9u8](https://MultiPress.biz/m0b9u8)

## ADVANTAGES

- The delivery lines are automatically ticked after delivery
- Order managers immediately have all the necessary information
- Extra time is gained and costs are optimised

Interested in more planning solutions? Go to [MultiPress.biz/1z0x9i](https://MultiPress.biz/1z0x9i)

## "MultiPress ensures an overview at any moment of the project."

**Benedict Cosaert** - Managing Director

## Crea Printing

Printing businesses do not always have to use 'normal' paper and its variants. For 30 years, Crea Printing has specialised in UV offset printing on plastics. They produce point of sales (POS) and promotion materials, packaging, decoration and custom-made solutions for customers in Belgium and abroad on a daily basis. Since its foundation in 1968, the company has shown a healthy growth rate and now boasts its own product developers, designers, packaging experts, high-performing and high-tech machinery and a unique prototype service. This clearly involves a great deal of administration, but what is most important is overview. A wide overview of an entire project at any moment! In addition, the MultiPress Expedition module has provided Crea Printing with the ease of use they were looking for in an MIS system. This module is obviously linked to all other administrative processes, from relationship management, calculations and quotations, order management, worksheets, planning, time and material registration to invoicing, reporting and many other processes. As a matter of fact, the expedition module is the result of all printing business processes.

Read more on [MultiPress.biz/wi4inh](https://MultiPress.biz/wi4inh)

# Web registration

## Registration in the **CLOUD**

The functions of the operator or printer have become increasingly extensive over the past years. That is why a brand new web-based registration module was developed in MultiPress. The module generates a planning-based job list and forwards it fully automatically to the operator. This makes it much easier to switch machinery. A simple start/stop function was furthermore provided so that the post-calculation of MultiPress is automatically fed. If desired, the operator can create and print a delivery note, delivery labels or even an invoice themselves. The reserved paper is also deducted from stock so that the stock is always up-to-date. Simplifying administration down to the smallest details!

More info on [MultiPress.biz/i2a1e5](https://MultiPress.biz/i2a1e5)

### ADVANTAGES

- Administration becomes easier
- The web-based job list is sent to the operator directly from planning
- Post-calculation is fed by a simple start/stop function
- Reserved raw materials are deducted according to actual use.
- Jobs are handled much more efficiently
- Stock is managed in real time without additional actions
- Delivery notes and labels are created by the operator
- Jobs are handled in production
- Payments are collected faster

**“Captains Of Printing works in a decentralised manner. MultiPress takes care of the centralised registrations through the web.”**

**Stefaan Moeyaert** - CEO

### Captains of Printing

Captains Of Printing is the result of a merger of 3 printing companies and several takeovers. The company has branch offices in Ruddervoorde, Torhout, Bissegem, Oudenaarde and Aalter. Captains Of Printing offers its customers a large range of print jobs zfor administrative and commercial purposes as well as for families and associations. Thanks to their up-to-date machinery, they keep innovating in modern and special printing techniques. They rightly call themselves a high-quality printing business. Of course, the company sets the same high demands for its business software. Since 2002, they have been relying on MultiPress to help manage their innovation and their many projects. After the merger, it was a major challenge to centralise production registrations in the several production units with an eye to a full post-calculation. How else can you gain insight into the utilisation rate and/or production efficiency?

Read more on [MultiPress.biz/d4yd04](https://MultiPress.biz/d4yd04)

Do you want to know more about registration and post-calculation? Go to [MultiPress.biz/yna92e](https://MultiPress.biz/yna92e)

# Electronic invoicing

**Save up to £30**  
per invoice

Electronic invoicing is an excellent example of process optimisation: the extremely old paper process of creating, sending, processing, paying and archiving invoices is replaced by automated exchange of electronic messages through the Internet. Electronic invoices can save the sender and receiver a great deal of money. The technology and the legal framework are available and MultiPress is totally ready for it. The MultiPress Electronic Invoicing module organises the digital traffic of sales and purchase invoices. A sales invoice is prepared in an XML or ASCII file with MultiPress format and uploaded in the customer's system through the import routine. Possible conversions are discussed during the creation so that everything goes smoothly. MultiPress can also digitally retrieve all purchase invoices from your supplier, which means that manual data input is no longer necessary.

With the e-invoicing module, all your invoices are managed completely digitally. The invoice is prepared and uploaded to the customer's platform with a XML-import. E-invoicing increases administrative efficiency. More and more companies work with digital invoices and even the Government specifies e-invoices in the outgoing tenders. MultiPress is ready for the invoice revolution!

DATALINE

 Read more on [MultiPress.biz/3z8w3q](https://MultiPress.biz/3z8w3q)

## ADVANTAGES

- Savings between £3 and £30 per invoice
- Fewer errors
- More efficient management
- 100% reliable invoicing

**“The connections  
within MultiPress are an  
important added value  
for us!”**

**Johan Meeuwens** - Sales Manager

## INTERLABEL

Interlabel's history in Aarschot goes back to 1907, but only after the first offset press came into operation in 1946, did the company apply itself exclusively to the production of paper labels for a wide range of purposes. Quality and service are their guidelines. They are supported by MultiPress, a strong and reliable business software package which they use daily to combine several labels on the printing sheets.

Many customers want to receive their invoices electronically. The Electronic Invoicing module makes a real difference. The additional advantages regarding purchase invoices came in handy. More time and fewer errors.

# Dashboarding & OverNight Procedures

## PND FRANCE

**“Work proactively with real-time result reports.”**

**Jean-Pierre Leborgne** - Managing Director

PND is a established name in the French world of sales promotion, belonging to the IOC Group with a total of 270 employees. The solution they chose to automate and optimise the back office was a very impractical one. Thanks to GSI Printing, they eventually found MultiPress. After many questions, examinations and conversations, they took the step and so the MultiPress flag was planted in the capital of France.

The homemade ERP system was not at all suitable for a graphic business of its size and for the inherent production processes. Therefore, the employees lacked reliable figures, and indicators, especially for production. The Multipress automatic report generator with its reliable numbers enables us to work proactively and prevent escalation.

DATALINE  Read more on [MultiPress.biz/av6k20](https://MultiPress.biz/av6k20)

**5 minutes**  
to be 100% up-to-date

### Dashboarding

The MultiPress Dashboard module serves like a compass pointing out the extremes in our administrative and production process. Each employee wants to be able to switch in a targeted manner and preferably based on real-time information. The web-based dashboards, visualised in an extremely graphic interface, support the user with information that adds value to the function profile. A number of these dashboards are of course standard, but we can also develop tailor-made dashboards at the customer's request.

### ONP (OverNight Procedures)

The report generator has been the icing on the MIS cake for many years now. Whether dealing with commercial or production statistics, the reports can be created by the user and subsequently exported to several sources.

The ONP module offers the possibility to draw up underlying overnight reports and subsequently send them to the different mailboxes according to a definable plan. Receiving reports proactively has the advantage that no prior manual action is required and the user receives their performance reports spontaneously.

DATALINE  Read more on [MultiPress.biz/3ln6o1](https://MultiPress.biz/3ln6o1)

## ADVANTAGES

- Proactive dashboarding
- Access to all essential information
- Via smartphone and mailbox
- Create once, use many

# Web2Print

Your Web2Print ready to use in  
**14 days**

Standard designs (businesscards, forms, letter paper, etc.) often only require minor adjustments. Thanks to the MultiPress Web2Print module, your customers can do this themselves! The Web2Print module can easily be integrated into your website. Existing PDF files can be personalised by providing them with variable entry fields. When your customer selects the layout, they can subsequently enter data in the variable fields. A preview is generated before the order is sent so that they can check whether everything is as desired. The order is then sent to the Web2Print module through the shopping cart. An order is created automatically in MultiPress, and the print-ready PDF files end up in the folder structure.

More info on [MultiPress.biz/rej6um](https://MultiPress.biz/rej6um)

## ADVANTAGES

- Web2Print template tailored to the customer
- Web2Print ensures easy ordering for the customer
- Validation of the Web2Print order by the order manager
- Only a few seconds per businesscards or personalised print
- No graphic knowledge required, user-friendly
- Multiple brands or corporate identities possible
- Clear stock and order history always available online
- Easy application of variable QR or vcard codes
- Easy integration into your website
- Automatic administration and production processing up to invoicing

## FABER DIGITAL SOLUTIONS

**“Give your customers the web platform that suits them perfectly.”**

**Yves Jeanbaptiste** - Managing Director

Faber Digital Solutions is located in the Grand Duchy of Luxembourg to the north of Luxembourg City. It is a digital printing business which specialises in Printing on Demand and transactional prints. Several major banks from the Grand Duchy of Luxembourg are customers of Faber. MultiPress Business Software being user-friendly and perfectly compatible because of its modular structure, Yves Jeanbaptiste, Managing Director at Imprimerie Fr. Faber, decided to use it in the digital sector as well. Faber Digital Solutions also provides Web2Print solutions, ensuring through cross-media solutions that all prints which are supplied directly by the customer can be offered in different ways. The main goal is to ensure that everything is processed in the same administrative manner in one system.

Read more on [MultiPress.biz/8owlwt](https://MultiPress.biz/8owlwt)

# Check & Repair

## 85%

less press downtime  
thanks to Check & Repair

The MultiPress Check & Repair module automatically checks and repairs the supplied PDF files. MultiPress sends a report with the errors and warnings present in the PDF file. If the errors are not repairable, the report is immediately mailed to the customer. The errors are clearly described with indication of their location in the document. As a result, neither your planning nor the order of your customer is jeopardised. If the document did not contain any errors or if the errors can be repaired automatically, the document is sent directly to the workflow. All supplied PDF files are displayed in the MultiPress Check & Repair module. MultiPress shows the size and colours of the supplied PDF files. Corrected PDF files can be added or inserted afterwards.

### WHAT IS IN IT FOR YOU?

- Check of PDFs from your folder structure
- Error reporting to your customers
- Repair of the documents according to existing profiles (Callas PDF toolbox)
- Preparation of corrected PDF for pre-press workflow

DATALINE

 Read more on [MultiPress.biz/2znfy4](https://MultiPress.biz/2znfy4)

### ADVANTAGES

- More time, fewer errors
- All MultiPress users receive a PDF Toolbox license
- You can get started quickly thanks to the user-friendly wizard with the most popular profiles (e.g. splitting pages and converting them to CMYK)
- You can display the correction with a clear before and after of the PDF file

DATALINE

## DE BIE PRINTING

**“The possibility to check incoming PDF files is an indispensable and efficient feature.”**

**Bart De Bie** - Manager

At De Bie Printing, not only the printing presses are buzzing. Founded in 1922, the company is now run by the 4th generation and is a rapidly growing company. De Bie Printing is expanding both geographically and technically. The strong reputation of the print experts has not gone unnoticed in the neighbouring countries. They boast very comprehensive services including the printing of mailings and special print processes like LE-UV printing and inline high-gloss varnish. The family-owned business did not leave anything to chance when opting for MultiPress Business Software to take care of the administrative processes. Over the years, the possibilities with MultiPress have increased. De Bie Printing once started with a single-user version, but now has a version accommodating 35 users. All MultiPress modules are used for at least 80%. This is also true for the Check & Repair module. When a PDF file enters in the folder structure of MultiPress, it is immediately checked based on a chosen profile, repaired when necessary and sent directly to the workflow.

DATALINE

# Order exchange with hospitals, schools, banks, etc.

## 90%

time saved through automatic order exchange

Schools, banks, multinationals, hospitals, etc. are organisations that require a lot of printed media. They usually have an ERP system (SAP, Dynamics, Baan, Ms Axapta, etc.). Your customer's purchase department generates print orders from their ERP software. The MultiPress WebB2B module ensures these orders are automatically read in into MultiPress and subsequently processed. This represents an unprecedented luxury for the customer and offers printing businesses a stronger guarantee that they will retain their customers.

Read more on [MultiPress.biz/49mien](https://MultiPress.biz/49mien)

## ADVANTAGES

- Seamless integration of orders directly into MultiPress
- More sustainable cooperation with the customer
- Automated processing without manual interference
- Higher margin
- Business case that can inspire other customers
- Fewer errors

More connectivity solutions? Go to [MultiPress.biz/c3twcc](https://MultiPress.biz/c3twcc)

## MANUFAST

### “From the order platform to our MultiPress without manual intervention.”

**Dominique Cluts-Seghers**

Director Operations, IT & Projects

Manufast is one of the largest sheltered workshops in Belgium for people with disabilities. The company creates employment in the Brussels-Capital Region for people with disabilities and boasts more than 250 employees. The company daily makes a difference as a supplier of both all-in and customised comprehensive solutions by combining technology with assignments that cannot be easily automated. Core business: mailing/handling with an in-house graphic department. In 2012, Manufast decided to replace their “range of isolated programmes” by one streamlined system: MultiPress.

MultiPress became the principal platform for all quotations, orders, registrations, invoices, financial follow-up and post-calculations. It was a must for Manufast to have their three activities - print, mailing, handling - consolidated in one platform and that recurring orders from selected customers were managed fully automatically: mission accomplished!

# MultiPress Mobile App

**Want to stay informed about what is going on in your company wherever you are? The MultiPress Mobile App for your iPhone, iPad or Android phone can help you.**

## 80%

of your commercial employees perform better with the Mobile App

The future is mobile and MultiPress contains all necessary information and customer data. The combination therefore speaks for itself. The MultiPress app makes it easy to consult the customer database and visitor reports as well as retrieve essential information from the sales information system (SIS). The customer's visit is followed by the visit report, which is forwarded directly using the MultiPress app. All calculations, jobs, turnover figures and complaints can be searched quickly for every customer on practically any mobile device. In addition, all jobs in production, accompanying status, possible subjobs and delivery dates can be consulted immediately and anywhere. Do you need important management information? No problem! The number of new price offers, orders and invoiced orders is immediately available, literally at your fingertips. The MultiPress Mobile App makes all of this and much more possible!

### WHAT IS IN IT FOR YOU?

- Clear overview of all information and history of the customer depending on the installed management modules
- Sales insights and visit reports
- Automatic reporting on backups, import of paper catalogues, etc.
- Order production status follow-up
- Overview of the orders received, the calculations performed, the daily and weekly turnover

More information on [MultiPress.biz/7re5fa](https://MultiPress.biz/7re5fa)

### ADVANTAGES

- You can consult your customer data anytime and anywhere. Literally
- Direct input of visit reports enhances the quality of customer data
- Real-time status of jobs in production
- Direct link to your phone and email application
- Communicate professionally, wherever you are

## Ready to transform your business today

### Jet Press 720S

The leading B2 inkjet press

With benchmark reliability and efficiency, our second generation B2 inkjet press has set new standards for digital print production, with a business model and ROI that make it an ideal fit to the growing market for high value, short run print. Delivering outstanding image quality on standard offset papers, the Jet Press 720S offers opportunities to print many new applications that were previously impossible to produce digitally.
